MP 166 SNIK Maintenance

Person in charge / Employee

Konrad Höffner, Thomas Pause

Progress compared to last presentation (Mar 16)

SNIK Ontology:

- add definitions for meta:feature property and meta:Feature class

- extend blue book catalogue for HITO

- connect BB with HITO

SNIK Graph

- improve release testing

- fix search

- highlight paths in subgraphs

- deactivate tap hold context menu on desktop browsers to prevent node move issues with slow PCs

Tip of the day: If multiple nodes are selected, only those get layouted!

Project Description

Maintenance of the SNIK Ontology and SNIK Graph

Open Points / Next Planned Steps

- Ontology: 39 open issues in milestone 0.9.3 (56 in total)
